---

This final Position Report for the 2008/2009 crop year is full of record-breaking shipments and receipts. You will also find the new Export Pages format that will take the place of the regular one-page export statistic page. The International Committee worked to create this new format and it was approved by the Board of Directors at their July meeting. The new format includes:

Page 1 – All Shipments Year-to-Date

- Includes only reporting countries that have been shipped >500,000 pounds during the current crop year-to-date. This takes the place of the old minimum reporting threshold of three or more handlers having shipped to a country.
- The + / - comparison to the prior year remains on the left side of the page, along with the Export Total % by Region.
- The World Region titles have changed along with the sub-groupings of the destination countries that fall under those World Regions.
- A column has been added on the right side of the page that shows the percentage difference of the current and last year year-to-date figures.
- A column has been added on the right side of the page showing the grand total shipments of the prior crop year by country.
- The final column on the right side of the page shows how current year-to-date figures compare to the total year-to-date country shipments from the prior year.
- The grand total lines on the bottom of the page also show what percentage of the shipments were shelled/mfg/products and Inshell.

Page 2 – Current Month Shipments Compared to Same Month of Previous Year

- The column on the far right side of the page compares these current monthly shipments with the same month of the previous year.
- The + / - comparison to the prior year remains on the left side of the page, along with the Export Total % by Region.
